## Halo for all

### The life of Formula 4- Juillet 2018

Designed to improve safety at the driver's head, the halo has made a remarkable arrival in 2018 in Formula 1 and Formula 2 thereafter. The single-seaters of the new Formula 3 Regional championships will also be equipped with halo.

The introduction of halo in Formula 4 will be staggered from next year through to 2023.

This innovation requires the design of a new monocoque, sized to support the stringent FIA load tests. Mygale is working on cost optimization to minimize the impact to its customers.
