Halo for all

The life of Formula 4- Juillet 2018

Designed to improve safety at the driver's head, the halo has made a remarkable arrival in 2018 in Formula 1 and Formula 2 thereafter. The single-seaters of the new Formula 3 Regional championships will be equipped.

For the Formula 4 the arrival of the halo will be staggered until 2023.

This innovation requires the design of a new monocoque sized to support halo pulling tests. Mygale is working on cost optimization to minimize the impact for its customers.
